

PHASE 1/PILOT BLOCK-DCNET FIBER - STREETLIGHTS

OVERVIEW

Location: Bound by 17TH to 19th St, I Street to Pennsylvania Ave, NW Washington, DC

Client: SAIC

Period of Performance: August 2016 – December 2016

Contract Value: \$219K

FMCC Job No.: 10335

Project Description

DCNET is engaged in a Smart City Initiative with DDOT's Street Light Asset Management team. DCNET, along with partners such as National Capital Planning Commission (NCPC) and Golden Triangle Business Improvement District (GT BID) is developing applications within a jointly selected pilot block on Pennsylvania Ave NW. DCNET will be extending its fiber infrastructure to the District's Street Light infrastructure enabling Wireless and Remote Lighting Management Applications. Phase 1 of the pilot block consists of approximately 80 street lights that will be converted to an LED lighting system along with remote monitoring capabilities. Additionally, there will be 30 Wireless Access Points (WAPs) approximately that will be placed strategically to provide necessary wireless coverage within the pilot area, about 76 motion Sensor Pods and 23 Video Nodes for showing vacant parking spaces.

Fort Myer was responsible for the removal and replacement of existing luminaires with LED, installing monitoring nodes and wireless access points.

Project Significance

Fort Myer was recommended to work on this project by the DDOT Street Lighting Engineer for the project to assist in the developmental stages of the project. This recommendation proves that our Electrical Department is recognized as being knowledgeable and their expertise is highly respected.
