

# MT. PLEASANT ST NW - UPGRADE STREETLIGHTS & MILL/OVERLAY

## OVERVIEW

**Location:** Mt. Pleasant St. NW from Park Rd. to Columbia Rd., Washington, DC

**Client:** District Department of Transportation

**Period of Performance:** April 2017 – April 2018 (Anticipated Completion)

**Contract Value:** \$ 1.9 M

**FMCC Job No.:** 10385

## Project Description

District Department of Transportation launched a Smart Lighting Project that will convert the District's streetlights to more reliable and sustainable light emitting diode (LED) technology.

LED's will have a life expectancy of 15 years and provide a truer white light quality, allowing colors to seem more natural and providing consistent distribution of light resulting in fewer darker spots.

Fort Myer is responsible for upgrading existing streetlights and installing new streetlights on Mount Pleasant Street, NW from Park Road to Columbia Rd. Our team is responsible for the construction of conduit duct-bank along Mount Pleasant Street with milling and overlay of the existing pavement and sidewalk restoration.

## Project Significance

This project will enhance safety in the community by providing lighting that is more energy efficient and cost effective. LED's will provide better, clearer, and more consistent light quality that will play a vital role in making DC's neighborhoods safer.
