

WAXPOOL ROAD EXPANSION

OVERVIEW

Location: Waxpool Road/Faulkner Parkway intersection (Route 640/ Route 2119) to Unbridled Way

Client: County of Loudoun, VA

Period of Performance:
June 2013 – December 2017 (Anticipated Completion)

Contract Value: \$2.8 M

FMCC Job No.: 9827

Project Description

The Waxpool Road Expansion project will widen the Waxpool Road/Faulkner Parkway intersection (Route 640/Route 2119) to Unbridled Way from two (2) lanes to four (4) lanes and install a traffic signal at the intersection of Waxpool Road and Ashburn Village Boulevard. The total length of this project is approximately 3,400 feet.

Commuters heading to and from the Dulles Greenway pass through this intersection daily. These improvements will drastically shorten wait times at the four-way stop and eliminate the traffic back-up that occurs during rush hour.

Fort Myer responsibilities include utility relocations, pavement widening, curb and gutter, storm sewer, traffic signal installation, signage & striping, maintenance of traffic, and installation of a traffic signal.

Project Significance

Construction of the Waxpool Road Expansion project has been ongoing since 2013 and has encountered significant overall project delays due to the discovery of unforeseen underground utilities. Also, during the time between plan approval and construction, additional utilities were installed as this area has a substantial amount of telecommunications infrastructure. Over the past eighteen months, a utility investigation process ensued and the multiple utilities involved have been coordinated.
